

REMARKS

The Office Action dated September 20, 2005 has been reviewed carefully. The title, claims and abstract have been amended in accordance with the Examiner's suggestions to bring the application in condition for allowance. Specifically, the title of the application is no longer in bold typeface and the abstract has been reduced to under 150 words. Further, the term 'axes' has been substituted for 'axii' in claims 1, 5 and 10, and the term 'disc-shaped' have been substituted for the term 'dic-shaped' in claim 10. Additionally, to align the specification with the claims, the term 'axes' has been substituted for 'axii' throughout the specification as a universal change.

All of the changes made in the specification and claims are non-substantive in nature.

It is submitted that Claims 1-20 are now patentable. Allowance of all pending claims is respectfully requested on the basis of these non-substantive revisions and amendments.

Reconsideration and early allowance are respectfully requested.

Respectfully submitted,

Eric A. Lerner
